

VLNC

Valence

What Valence is

A high-end branding, marketing and storytelling company built around one central belief: people do not respond to information alone. They respond to meaning, emotion, memory, timing and trust.

The role

Valence finds the language between what someone means and what the world understands.

It turns identity, context and emotional truth into strategy, communication and experiences that feel clear, credible and difficult to forget.

WHAT WE SHAPE

Identity

Founder voice

Digital presence

Perception

Story

Cultural position

PROMISE

Turn what is difficult to express into something people can understand, feel and remember.

Meaning behind the name

Valence is the emotional charge something carries: what moves people towards it, makes them trust it, remember it or feel indifferent to it.

A name can be correct and still feel empty. A campaign can be polished and still leave no impression. A founder can be brilliant and still remain misunderstood.

Valence works on the invisible layer that changes those outcomes.

What does this make people feel?

What will they remember when details disappear?

What creates attraction, trust, curiosity or conviction?

VALENCE

emotional charge

Strategic frame

The identity needs to hold two energies at once: architectural clarity and human sensibility.

POSITIONING

A branding and marketing agency for brands, founders and ideas with substance that needs sharper expression.

PRIMARY TENSION

Make strategy feel alive without making the brand look decorative or soft.

CORE BEHAVIOR

Find the signal. Remove noise. Build recognisable emotional weight.

DESIGN BRIEF

Bold VLNC shorthand. Valence as a signature full-name mark. Minimal, premium, adaptable.

Chosen direction

A bold VLNC mark supported by a human, signature-style Valence wordmark.

Why it works

The shorthand gives scale, strength and memory.
The signature gives authorship, humanity and creative intelligence.

Logo architecture

The system should not depend on one static logo. It needs a family of marks with clear roles.

PRIMARY SHORTHAND

VLNC

The bold mark for high recall, signage, icons and campaign worlds.

FULL NAME SIGNATURE

Valence

The human mark that feels authored, personal and ownable.

MASTER NAME

VALENCE

Used wherever trust, recognition and clarity matter.

Recommended hierarchy: VALENCE as official brand. VLNC as shorthand. Signature mark as expressive endorsement.

Primary shorthand mark: VLNC

Bold enough for Gen Z visual culture, structured enough for premium branding and marketing work.

VLNC

Design principles

Blocky, but not brutal

Balanced, not overly curved

Ownable, not fashion-tech generic

Works on any background

Strong as signage, favicon and stamp

EDITABLE LOGO APPROXIMATION

VLNC

VALENCE

In final production, the VLNC mark should be redrawn as a vector with custom letter cuts and optical spacing. This slide uses editable type as a working approximation.

Valence as signature font

The full name can become the human counterweight to the bold shorthand mark.

A white, elegant, handwritten-style script of the word "Valence" on a black background. The letters are fluid and connected, with a prominent, sweeping 'V'.

SIGNATURE WORDMARK

A white, bold, sans-serif shorthand mark "VLNC" on a black background. The letters are thick and blocky, with a modern, geometric feel.

SHORTHAND MARK

Direction

The signature should not feel like a generic handwritten font. It should be custom-lettered: fast, confident, legible, and slightly cinematic. It says this work is authored, not templated.

Logo lockups

Use the mark according to context. The system should flex without losing recognition.

Usage rule

Use **VLNC** when speed and recall matter. Use **VALENCE** when credibility and searchability matter. Use the signature only when the brand needs warmth, authorship or premium personality.

Clear space and scale

The mark should feel intentional even at small sizes.

Clear space = height of the V stem around the mark.

Minimum sizes

Signage / deck cover	No restriction, optical balance matters
Social icon	Minimum 80 px
Email signature	Minimum 120 px wide
Presentation footer	Minimum 0.6 in wide

Color system

The palette begins as high-contrast agency authority, then expands into organic, elemental depth.

Core palette

**ONYX**

#0A0A0A

**BONE**

#F3F2EF

**STONE**

#A6A39E

**VERVE**

#E35A2A

**GOLD**

#C8A24C

Organic expansion

**FOREST**

#223D2E

**MOSS**

#7A7E56

**SEA**

#0B5962

**SAHARA**

#C49B5B

**SKY**

#8C9FB3

Rule

Use black, bone and stone as the daily system. Use orange as a signal, never as decoration. Use forest, sea and sand when the brand world needs depth, nature, body, ritual or movement.

Typography system

The deck itself remains editable. Final brand use should be licensed or custom-drawn.

DISPLAY / VLNC ENERGY

**Söhne Breit
Savate
Druk Wide
Monument Grotesk**

Bold, wide, architectural, high recall.

SYSTEM SANS

Neue Haas Grotesk
PP Neue Montreal
Suisse Int'l
General Sans

Clean, modern, editorial and flexible for
decks, websites and proposals.

SIGNATURE / CONTRAST

Custom Valence
Signature
Canela
Editorial New
Cormorant Garamond

Used sparingly for authorship, luxury and
humanity.

PowerPoint fallback: Aptos Display / Aptos / Arial Black / Georgia / Segoe Script. Replace with licensed fonts before launch.

Aesthetic direction

A visual world that feels digital, bodily, organic and strategic at the same time.

KEYWORDS: blurred motion / body intelligence / elemental texture / strategic overlays / cinematic quiet / editorial control

Photography and texture

The brand should not look purely corporate. It needs atmosphere, touch and a sense of inner movement.

Do not use generic office, laptop, handshake or smiling-team stock images. Use feeling, friction, nature, movement, texture and human presence.

Graphic language

Create a world around the logo with repeatable but not rigid visual gestures.

AXIS LINES

**Thin rules, small coordinates,
editorial dividers.**

BRACKETS

**Strategic framing, focus, agency
precision.**

SIGNAL BARS

**A small orange pulse to guide
attention.**

ORBIT DIAGRAMS

**For psychology, memory, influence
and response.**

BLUR FIELDS

**Movement, perception,
transformation.**

TEXTURE PANELS

**Stone, paper, skin, water, forest,
metal.**

Digital language

Valence social design should feel like strategic editorial content, not agency templates.

Application system

The identity should feel strong on signage, decks, stationery, website, social and founder communication.

Brand voice

The visual identity should be supported by language that is sharp, human and hard to forget.

NOT

Content production

BUT

Perception architecture

NOT

We make brands look good

BUT

We shape how brands are felt, read and remembered

NOT

Luxury through decoration

BUT

Authority through judgement

Tone: elite, but not distant. Intelligent, but not bloated. Beautiful, but never empty. Emotional, but not indulgent. Strategic, but still alive.

Implementation roadmap

What needs to happen before Valence goes public with the new identity.

01 Vector refinement

Redraw VLNC with custom cuts, optical spacing and clean light/dark versions.

02 Font licensing

Choose final display, system and signature fonts. Secure commercial licences.

03 Brand kit

Create logo files, PPT template, social grid, letterhead, invoice, proposal and email signature.

04 Digital migration

Domain, handles, SEO redirects, website language, Google Business and LinkedIn update.

05 Launch world

Founder note, team message, carousel, reel, website launch and client announcement.

Priority: lock the mark and fonts first. Everything else becomes faster once the identity system is stable.

VLNC

Valence

The strongest brands are not simply seen.

They are recognised. They are trusted. They carry a feeling before their name is even mentioned.

VALENCE
